

Ready to go headends

The pre-configured TDH 800

Saving you time and money

We're taking the pain out of your installation with our newly pre-configured TDH 800 headend.

The ultimate hospitality headend is now available with modules mounted and software loaded straight out of the box. It's the hassle-free way to save time and money on your installation.

YOUR BENEFITS

- **SAVE TIME:** Pre-installed modules and software save you valuable setup and configuration time.
- **SIMPLICITY:** Save money and time by ordering one complete product, instead of handling multiple orders and article numbers.
- **RELIABILITY:** Renowned TRIAX hardware, tested and fully updated with the latest software.
- **SECURITY:** Receive free PID activation keys when you register your solution with a Basic SLA.

HOTEL BENEFITS

- **SAVE TIME:** No need to investigate the market. The TRIAX TDH 800 is customised to and perfectly suited for hospitality market needs.
- **SIMPLICITY:** Intuitive HTML5 user interface and plug & play installation.
- **RELIABILITY:** Maximum uptime keeps guests happy and improves hotel ratings.
- **SECURITY:** Remote maintenance and full online backup for peace of mind.

TRIAX

connecting the future

The pre-configured TDH 800 offers plug & play installations and remote access – reducing configuration, installation and service time.

Just mount the headend, connect the TV signals, output to the distribution network, and you're done.

Save time – save money – increase margin

- All modules in the main unit are pre-installed
- Software is pre-installed, updated and tested
- A complete headend solution at a reduced cost

The TRIAX TDH 800 headend supports the newest technologies and industry standards, and can easily be re-configured and adapted to new location and installation requirements.

Our scalable TDX Pool technology handles multiple inputs (DVB-S/S2/T/T2/C, AV and HDMI) and multiple outputs (PAL, QAM and COFDM) simultaneously.

SNMP monitoring, remote access and SLA options enable lower cost upgrades, configuration changes, monitoring and service & support cases.

What's more, the ultra-low power consumption reduces operating cost and is environmentally friendly.

TDH 800 digital headend

The all-rounder with innovative pool technology

What's in the box

Everything you need, pre-loaded

- Main headend unit
