

TRIAX

connecting the future

The best entertainment
you can give to your guests...

triax.com

The best entertainment you can give to your guests is **the entertainment they bring from home**

What would you like to offer your guests?

When it comes to guest TV, it's not a question hoteliers agonise over every day. Nor should you: in today's ever more personalised media landscape, more and more guests simply expect to access the streaming services they're used to at home.

How do you want to offer it?

It's not all about the number of services you can offer. To meet the demand for streaming content, just connect every in-room TV to a network. And once the TVs are connected, the possibilities are endless...

Cast away

The growth in the streaming market is exploding: subscribers number in the hundreds of millions, and new services can acquire millions just on launch day. That's more and more guests with their own films, TV, music and sport already in their pockets. They'll want to cast directly to their in-room TV, preferably in Ultra HD.

Game changer

Cloud gaming is another market booming, while traditional TV declines. With interest from a wider demographic than you might expect, male and female guests of all ages will be hoping to keep on playing during their stay, in the highest quality possible. All you need to do, is let them connect.

IPTV

Serving guests content you control also adds huge value to the guest experience. IPTV makes a vast range of connected services possible, such as Video on Demand or in-house promotional channels. All accessed from a welcome menu that meets your hotel's unique brand.

Today's trends, tomorrow's essentials

A wired network connection to the TV is the best way to meet current and future guest entertainment demands. We make this possible for a fraction of the price and none of the installation disruption.

Introducing TRIAX EoC

Fast network connection to every room
None of the costs of new cables

LOW COSTS

- Uses your existing coax cables: no need for expensive re-cabling projects.
- Reduces need for costly traditional TV subscriptions.

GOODBYE, BUFFERING

- Gigabit network delivered over coax cables: the fastest, most reliable in its class.
- Ready to stream demanding content: 4K UHD, HDR & 60FPS.

ENVIRONMENTALLY FRIENDLY

- We're re-using the cables you already have
- Comparable devices to the TRIAX EoC MediaConverter use up to 100% more power.

NO DISRUPTION

- No drilling, no new cabling, no rooms out of service. Installs in minutes in each room.

FUTURE READY

- Enough bandwidth to handle future upgrades to your internet connection speed.

ADDED VALUE

- Enables a limitless range of in-room connected devices, such as Wi-Fi access points.
