TechniSat HD-S 223DVR Satellite Receiver DVBS2

The HD-S 223 DVR stands for a brilliant TV experience in HD quality.

With this digital SAT receiver You can receive unencrypted TV and radio programs via satellite. DVR stands for "Digital Video Recorder". You can use the recording function to conveniently record programs on a USB stick. Alternatively, it is possible to stop the program using the Timeshift function and continue it at a later point in time.

The integrated EPG (electronic program guide) provides a program preview up to seven days in advance.

Thanks to the compact design, You can also use the HD-S 223 DVR in TV racks or rooms with little free space.

In addition to TV reception, the device is also equipped with a USB media player for playing video, music or image files.

|---|--|----------------------------|
| <p>305415</p>  | <p>MAG540 IP STB 4K</p> <p>MAG540 and MAG540w3 are Linux STBs powered by the quad-core ARM Cortex-A35 CPU with a brand new Amlogic S905Y4 chipset. This hardware makes the model much more powerful than the legacy STBs. The devices ensure easy and smooth playback of content in all popular modern video formats, including 4K. With MAG540/540w3, operators can offer reliable service to their subscribers. The interface continuity makes the model easy to integrate into projects that previously used MAG set-top boxes. Great for Projectors and TV's without IPTV tuners,</p> <p>This STB is suitable for TDX and TDcH IPTV and Flow systems.</p> <p>Size: 120 x 78 x 21mm</p> | <p>Brand: OEM</p> |
